Autobiography by Wang YuQi.

Book about his life from 1938, childhood in Jinzhou with liberation of the city from Japanese invaders. How they became refugees and travelled from one city to another. First love and culture revolution time. Through this book you can feel the atmosphere from old China until now, 78 years. The old story is like a fog surrounding writer's heart, slow motion camera shots. Take you to see what is the fist generation railway workers life in North-West of China. How they survive from that time.
