Beneath the surface

To Voyagers, Dark Souls and Dreamers

THOUGHTS

IN COSMOS

Pulse
the creator of the universes
necessity of being

different physic-laws of the universes
physics and coincidence
confusers of the space

sources of life, the spiral galaxies
death-rays of the supernova
the cosmic ocean of life and death
the riddle of spiral

I'm a thinker, free thinker
not believer...but still I believe...in greater forces
there's got to be something...
in the star-idea bubble-incubator

...

I ride a comet
I'm in a flyby and I'm just scratching the surface
time flies, time teaches
light seeks

are we connected to each other in the multiversum?
Different versions of everything
different versions...of me

friendly whales are swimming towards me
whales are staring at me and they communicate telepathically:
"the bigger you are, the faster time goes...and the smaller...more slowly
time is relative
all living is one
yoga"

observing eyes of eternal night
eyes of investigator
eyes of the superior creature proceed monitoring...

far away...

in the infinity

A mystical trip
into the soul landscape of
the poet. A dark fantasy with real
photographs. To voyagers, dark souls
and dreamers.
