# *The Beginning*

Through all times world has been full of stories and sagas, one greater than the other, that have been born from experiences of men. Time has colored and added something to them. Stories have changed and will always change over time but there is always something old and genuin in them.

I was standing in the dark of the northern Lappland morning one day. Eating gingerbread chocolate and looking for shooting stars. I had been balling around a thought about making of a new sockbook, but I wanted it to be something meaningful. I wanted to be something that would be passed on from generation to generation like a northern saga. And thats how this bookseries was born-Northern saga of wool socks

I hope You wnjoy the book and find something new time and time again from the models, something joyfull and happiness in life. I hope you will give yourself some slack and with mistakes in knitting and be proud of youre handywork. Choose new colours and let the needles jingle.

From this first part of the series you will find 20 patterns. Some of them have previously been published in th ebook Rhytm of Nature, I wanted to add them along and be part of this saga.

This book has been translated into English by two amateurs. So forgive us for the mistakes. Thank you for your help Katja Huuskonen.

*Katja Makkonen*

One morning I was standing in the dark of northern Lapland. I watched star flights in the sky. I had been thinking about writing a new sock book. I wanted something significant about it. I would like a book that would be handed down from generation to generation, like the sagas and stories of the north.

This is how the book series Northern Sock Saga was born.

You will find 20 sock patterns in this first part.  
Let's enjoy this wonderful hobby together.
