## INTRODUCTION

The Artwork explores authorship through filming and texts. The Illustrations that fit into everyday life are suitable and create new meanings in both areas. Throughout the work new benefit, perspectives and meanings are born and the artbook material develops more professional skills. The images give the text a different life and awaken thoughts. The style of the book is textual images and the impact they have.

Moving is part of the artbook project. Both public transport and private vehicles have the possibility of sustainable development. Impressive is the different smell of the pine forest.
